PROFESSIONAL DFS
AIR PURIFICATION SYSTEM

HealthWay Compact Turbo Professional Air Purification System

The HealthWay Compact DFS Air Purifier is designed for small office or conference room use. It uses the same advanced, patented technology that makes HealthWay the world leader in indoor air quality. The simple, stylish design compliments any work space decor.

SPECIFICATIONS

Protects up to 500 sq/ft

Dimensions (inches) 11.22 x 15.15 x 22.23

Weight 17lbs (8kg)

Colors: White

120V 60Hz or 230V 50Hz

Blower Speed	Energy Usage (Watts)	Air Flow	Particle Efficiency
Low	9	22 cfm	100%
Med	15	49 cfm	100%
High	25	79 cfm	100%
Turbo	61	150 cfm	100%

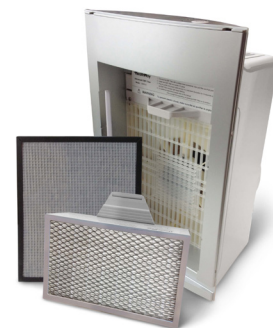

Our technology is individually tested to guarantee better than HEPA, efficiency removing 99.99% of particulates @ 0.007 micron. This makes HealthWay the most efficient air purifier available.

FEATURES

- Particle efficiency - 99.99% @ 0.007 micron
- 6-stage VOC adsorption filter for heavy removal of harmful gases and odors
- Patented DFS technology efficiently removes up to 99.99% of airborne mold, bacteria, and viruses passing through the system
- Each machine is independently tested and certified to guarantee better than HEPA efficiency

- Substantial reduction in airborne microorganisms, chemicals, offensive gases, odors, and smoke.
- Less dust and dander, pollen, dust mite waste, bacteria, mold, fungi and virus protection
- Compact, ultra slim design
- Easy to maintain
- A clean and fresh smelling environment
- The revolutionary DFS technology reduces bioburden and inhibits microorganism growth passing into the system through microbiostasis condition
